

Configure your PDA (Palm OS) to work with .mdEmail™

1. Launch VersaMail on your PDA. Select "Accounts", then "Account Set-up".
2. Select "New account" to add your .mdEmail™ account.
3. Choose an Account Name that you would like to be affiliated with your .mdEmail™ account.
4. Choose "Other" from the pull-down menu as the mail service.
5. Choose "POP" from the pull-down menu as the assigned protocol. Select "Next".
6. Enter your .mdEmail™ address *username@domain.md* as your username and your personal .mdEmail™ password. Select "Next".
7. Enter the following server information:
 - Incoming server: pop.mdemail.md.
 - Outgoing server: smtp.mdemail.md.
8. Select "Next".
9. You will receive a basic setup confirmation. Choose "Advanced" for additional settings.
10. Under Incoming Server Options:
 - Port Number: 995
 - Select "Use Secure Connection (SSL)"
Note: selecting SSL will cause the port number to change from 110 to 995.
 - Leave "Use Authentication (APOPO)" unselected, click "Next"
11. Under Outgoing Server Options:
 - Port Number: 25
 - Select "Use Secure Connection (SSL)"
 - Select "Use Authentication (ESMTP)", select "Done"
12. Following this step, you will return to "Account Set-up". Click "OK" to enter your .mdEmail™ account then select "Get" to retrieve your email.
